

Field chilling

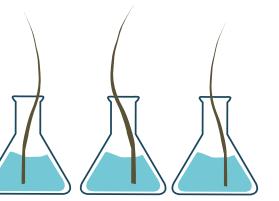

Controlled chilling:  
0 or 21 days at 4°C

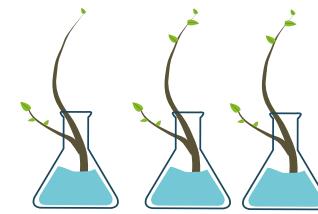

Forcing: 15:5°C  
Photoperiod: 8 hours

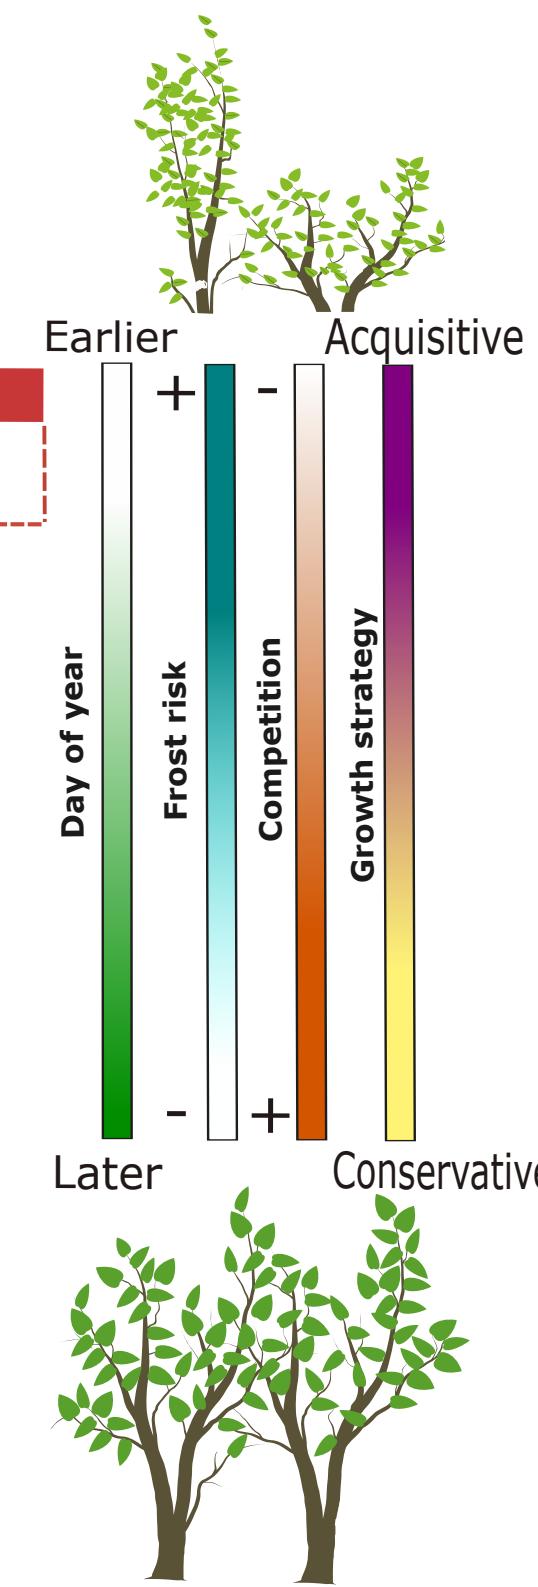

Field chilling

Controlled chilling:  
30 or 56 days at 4°C

Forcing: 20:10°C  
Photoperiod: 12 hours

### Early budburst

- Low leaf mass area
- High Leaf Nitrogen Content)
- Short height
- Smaller diameter
- Low wood density
- Diffuse-porous wood anatomy

### Late budburst

- High leaf mass area
- Low Leaf Nitrogen Content)
- Tall Height
- Greater diameter
- High wood density
- Ring porous wood anatomy
